PROFESSIONAL SUMMARY

2026 Computer Science & Engineering graduate (B.E., CGPA 9.39/10) seeking an apprenticeship in Enterprise Technology Services. Writes code in Java, Python, JavaScript and SQL, and has built and tested REST APIs backed by relational databases (PostgreSQL, MySQL) across web and Android applications. Experienced in debugging, automated API testing (Jest, Supertest, k6), Git/GitHub collaboration and Agile team delivery. Curious, customer-focused and data-driven, with a strong desire to learn and turn ideas into working software.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, SQL, Kotlin, C
APIs, Web & Mobile: REST APIs, Node.js, Express.js, React.js, Vite, Tailwind CSS, HTML, CSS, Axios, JSON, Android (Kotlin, MVVM), Flutter
Databases: PostgreSQL, MySQL, SQLite, MongoDB, Room Database
Testing & Automation: Jest, Supertest, k6, API Testing, Integration Testing, Load Testing, Debugging, Rate Limiting
AI / Data: Generative AI API Integration (Gemini), Machine Learning, NLP, Random Forest
Cloud: AWS (S3, EC2), IaaS, PaaS, SaaS
Core CS & Tools: Object-Oriented Programming, Data Structures & Algorithms, DBMS, Computer Networks, Agile, Git, GitHub, Postman, VS Code, Android Studio

PROJECTS

AI Finance Autopilot – Full-Stack Personal Finance Platform (Team Project) *Live Demo | GitHub*
Tech: React, Vite, Tailwind CSS, Node.js, Express.js, PostgreSQL, REST APIs, Gemini API, Jest, Supertest, k6

- Web application where users upload transaction data as CSV files; transactions are stored in PostgreSQL, categorized (Food, Shopping, Travel, etc.) and shown on a dashboard with income, expenses, savings, budgets and spending trends.
- Owned authentication, dashboard, AI insights, backend integration, rate limiting and testing; teammate owned signup, budgets and transaction management.
- Built an AI insights REST endpoint: the backend calculates totals, savings rate, category breakdown and budget status from PostgreSQL, then sends a structured summary to the Gemini API for a natural-language insight. Added an 8-second timeout with a rule-based fallback so the endpoint still responds if the AI call fails.
- Implemented API rate limiting (login/signup: 5 requests per 15 minutes per IP; insights: 10 requests per minute per IP) and verified 429 responses under concurrent requests.
- Wrote automated API and integration tests with Jest and Supertest. Load-tested the dashboard API with k6 (10 virtual users, 30 seconds, ~300 requests, ~9.7 requests/sec, ~13 ms average response time, 0% errors in a controlled local test).

Shishu-Sneh – Offline-First Android Healthcare Application
Tech: Kotlin, Room Database, SQLite, WorkManager, MVVM, Generative AI APIs

- Built an offline-first Android app with Growth Tracker, Vaccination Calendar, Milestone Checklist and Feeding Guide features, using Room (SQLite) local persistence and MVVM architecture.
- Automated recurring reminders with WorkManager, integrated Generative AI APIs and tested application workflows before release.

GATServe – AI-Powered Food Ordering Platform
Tech: Flutter, Node.js, Express.js, MongoDB, PostgreSQL, Machine Learning, NLP

- Developed menu and order workflows, backend integration, an admin dashboard and leftover inventory visibility.
- Applied Random Forest demand forecasting and NLP-based sentiment classification to support data-driven decisions.

INTERNSHIP

Android App Development Intern (Generative AI) – MindMatrixEd, Bengaluru *Feb 2026 – May 2026 (Internship, 4 months)*

- Developed Android features in Kotlin and integrated Generative AI APIs; built the Shishu-Sneh application end to end during the internship.
- Implemented local data persistence with Room Database (SQLite) and automated recurring background tasks using WorkManager.
- Worked in an Agile team using Git/GitHub for version control; tested and debugged features to resolve issues before release.

EDUCATION

B.E. Computer Science & Engineering – Global Academy of Technology, Bengaluru *2022 – 2026 | CGPA: 9.39/10*

Pre-University (PCMC) – Sri Chaitanya PU College, Bengaluru *2020 – 2022 | 97.3%*

CERTIFICATIONS

Java Foundation Certification | Linux Foundation Certification | Data Science Foundation Certification | Career Essentials in Generative AI (Microsoft & LinkedIn Learning)

VOLUNTEERING

Student Coordinator (Volunteer) – IT Virtuoso Club, Global Academy of Technology *Jul 2024 – Jun 2026 (Volunteering)*

- Coordinated technical events and workshops for the CSE department, including the Brainstorm Battle competition; volunteered at Hack-A-League 3.0, a national 24-hour hackathon, supporting event operations.
